

JORGE BANOS

+51 997 025 331 | El Agustino, Lima, Peru | jorge99bc@gmail.com

Semi-Senior Front-End Programmer Analyst with experience in frameworks, programming languages, and tools. Skilled in Back-End development with Java and Python, particularly in the creation of services and APIs. I have applied my knowledge across various projects using tools such as Bitbucket, Confluence, and Jira, while working under agile methodologies.

I stand out in UI design and JSON data manipulation, with a strong commitment to clean code and development best practices. Open to new challenges that allow me to innovate and explore new technological frontiers.

Computer Systems Engineer, Universidad Privada del Norte (UPN). LinkedIn:

- CRM System Processes.

PROFESSIONAL EXPERIENCE

MC ASESORIA & GESTION E.I.R.L.

A Peruvian company incorporated as an Individual Limited Liability Company (E.I.R.L.), with active operations registered before SUNAT and headquartered in Lima. The company is dedicated to providing comprehensive consulting services in the areas of accounting, taxation, and business management.

The firm specializes in the digital transformation of administrative processes, offering solutions ranging from company incorporation and tax planning to the implementation of ERP systems and electronic invoicing tools. With a strong focus on risk prevention, the organization acts as a strategic partner for growing businesses, ensuring regulatory compliance through the use of modern technologies and highly accurate preventive audits.

Full Stack Developer / DevOps – IT Department (Independent Contractor)

February 2026 – Present

Responsible for the design, development, and maintenance of critical systems and corporate web platforms using Angular, Java, and WordPress. Managed the institution's technical platform, ensuring Core optimization, security updates for plugins and themes, and the stability of the production environment.

Led the end-to-end development of a custom CRM sales system, implementing the frontend with Angular and the backend with Java using IntelliJ IDEA for commercial automation. Participated in the SIFA - OEFA project under Cisco infrastructure, performing DevOps tasks for merge approvals in GitLab, bug fixing, and improvements to Oracle-based architectures. Managed secure environments for the OECE system through the configuration and use of Fortinet VPN, ensuring connectivity and component deployment within SQL Server infrastructures. Worked based on Figma designs, integrating visual design with the system's functional logic under user experience standards. Led version control and workflow management in GitLab, ensuring source code integrity, change management, and secure handling of sensitive data exchange.

- Led the end-to-end development of a CRM sales system, successfully transitioning manual processes into a modern architecture based on Angular and Java (Spring Boot).
- Reduced incident response times by 40% through preventive technical support and bug optimization within SIFA-OEFA environments, improving overall web platform stability.
- Optimized the performance of the corporate web platform by 50% through corrective maintenance of the WordPress Core and debugging of critical plugins and themes.
- Ensured 100% deployment integrity in GitLab by temporarily assuming the DevOps role, validating merges and applying code quality controls before production releases.
- Implemented secure connections and remote workflows through Fortinet VPN for the OECE system, guaranteeing operational continuity and protected access to SQL Server and Oracle databases.
- Improved UI/UX implementation accuracy by 90% by technically translating high-fidelity Figma prototypes into fully functional Angular components.
- Strengthened the security and scalability of digital assets by applying development best practices and version control aligned with government cybersecurity standards.

COSAS PERUANAS S.R.L.

A Peruvian company incorporated as a Limited Liability Commercial Company since November 2009, currently active before SUNAT, primarily dedicated to IT consulting and technology management. The company provides development and maintenance services for digital solutions such as B2C/B2B e-commerce stores and websites on platforms like Magento and WordPress. It also offers digital marketing services (SEO, social media advertising, automation, and analytics), data processing, and web hosting services, with infrastructure on dedicated and cloud servers. In addition, the company has been registered as a supplier of goods and services for the Peruvian government. Although it does not have registered foreign trade activities, its focus is to support businesses and projects in their digital transformation through modern technologies.

IT Programmer– IT Department(temporary)

july 2025 – august 2025

Responsible for the maintenance, optimization, and continuous technical support of the corporate web platform developed in WordPress. Managed preventive and corrective maintenance of the website, including regular updates of the WordPress Core, themes, and plugins.

- Development and creation of websites in production environments using Magento, HTML, and the Elementor library.
- Formation of Environment Governance Teams, component deployment, and operational QA aligned with business objectives.
- Regular updates of the WordPress Core, themes, and plugins, ensuring platform stability, security, and performance.

SOFTWARE ENTERPRISE SERVICES(SES)

A Peruvian information and communications technology company primarily focused on providing technological services and solutions to support the digital transformation of organizations. Its services include software development (software factory), testing and QA, IT outsourcing and staffing, Help Desk support, technology infrastructure integration, mobile applications, electronic invoicing, document management, business intelligence (BI), IT training, and BPO services.

The company operates across various sectors such as banking, energy, retail, government, and education, with offices in multiple countries across the region. Its main focus is to deliver consulting services and customized technological solutions aimed at improving business processes and increasing client productivity.

Front-End Programmer Analyst (Full-Time Employee)

August 2021–February 2025

Participated in the development and migration of banking web platforms for Scotiabank, focusing on the modernization of legacy applications toward React-based architectures. Collaborated in the development of reusable components, integration of internal services, and optimization of the user experience, while complying with strict security standards, quality requirements, and financial sector regulations under the SCRUM methodology.

- Participated in 3 banking web platform migration projects, contributing to the successful transition from legacy technologies to modern React-based solutions.
- Reduced production error rates by up to 80% through the development of more stable components and validated forms using React Hook Form.
- Improved code performance and maintainability by applying component-based architecture, best practices, and state management techniques.
- Integrated APIs and internal services using Axios, adapting interfaces to the requirements of different regions and business units.
- Implemented clear and scalable navigation flows using React Router, enhancing the end-user experience.
- Supported code reviews, functional testing, and deployments, strengthening product quality in highly critical environments.
- Worked with Git, Bitbucket, and Jira, following agile processes and security guidelines specific to the banking industry.

ACADEMIC BACKGROUND

- | | |
|---|----------------------|
| ▪ Universidad Privada del Norte – Computer Systems Engineering | 2023 -Present |
| ▪ Cibertec – Computer Science and Information Technology | 2020 |

ADDITIONAL TRAINING

- | | |
|--|-------------|
| ▪ UDEMY. Back-End Development with Python | 2025 |
| ▪ CEPS UNI. Business Excel Specialist | 2017 |
| ▪ CEPS UNI. Python Fundamentals | 2021 |
| ▪ I.E.IDAT. Web Design and Development | 2022 |
| ▪ SCRUMSTUDY-Scrum Fundamentals Certified(SFC) | 2025 |
| ▪ AMAZON WEB SERVICES. AWS Academy Graduate – Cloud Operations - Training | 2025 |

ADDITIONAL INFORMATION

- **Intermediate Level:** English, Microsoft Office, Microsoft Project, Bizagi, UML, Java Development, JavaScript, Oracle, CA Clarity, Rally, ClearQuest, Qmetry, Windows Server, SQL Server 2008, Azure Repos, Everest, AS400, .NET, and Java.
- **Advanced Level:** Excel, Jira, and React.
